Subject: Corpus Water Incident - Latest electronic draft 104(e)s

Hi David and Linda,

I'm attaching the latest electronic drafts of the 104(e) letters to Ergon and Valero for your convenience. These are the drafts I printed when incorporating Mark Peycke's comments and correcting the address and addressee for the Valero letter. I'll note that both versions were saved on March 24, the same day Ben signed them. I also remember the correction requested by Deborah was for Ben's official title as part of his signature. I made the correction, but don't remember if I printed the corrected cover letters, nor do I remember what happened after that. I assume they were printed and returned to Deborah for Ben's signature that same day.
